

# Exposure Java A, 2008 Table of Contents

## Chapters I - XXII

<b>I Introduction to Computer Science</b>		
1.1	Teaching the Exposure Way . . . . .	2
1.2	Exposure Equation . . . . .	4
1.3	Roller Coaster Emotions . . . . .	7
1.4	Tackling Computer Science . . . . .	8
1.5	Excessive Help . . . . .	10
1.6	Computer Fundamentals . . . . .	11
1.7	A Brief History of Computing . . . . .	12
1.8	How Do Computers Work? . . . . .	18
1.9	Messages with Morse Code . . . . .	19
1.10	Electronic Memory . . . . .	22
1.11	Counting in Other Number Systems . . . . .	26
1.12	Memory and Storage . . . . .	28
1.13	What Is Programming? . . . . .	31
1.14	Programming Languages . . . . .	33
1.15	Networking . . . . .	38
1.16	Hardware and Software . . . . .	40
1.17	Summary . . . . .	42
<b>II Introduction to Java</b>		
2.1	Introduction . . . . .	46
2.2	Getting Started with Java . . . . .	47
2.3	A Visit to the United Nations . . . . .	47
2.4	Java Bytecode . . . . .	49
2.5	Applications and Applets . . . . .	52
2.6	Installing the Java Development Kit . . . . .	53
2.7	Installing the JCreator IDE . . . . .	70
2.8	Text Output With println . . . . .	89
2.9	Program Compile Errors . . . . .	95
2.10	The Responsible Use of Computers . . . . .	98
2.11	Summary . . . . .	104

<b>III Java Simple Data Types</b>		
3.1	Introduction . . . . .	108
3.2	Declaring Variables . . . . .	108
3.3	The Integer Data Type . . . . .	113
3.4	The Real Number Data Type . . . . .	116
3.5	Numerical Representation Limits . . . . .	118
3.6	Arithmetic Shortcut Notations . . . . .	123
3.7	The Character & String Data Types . . . . .	127
3.8	The Boolean Data Type . . . . .	130
3.9	Declaring Constants . . . . .	131
3.10	Documenting Your Programs . . . . .	132
3.11	Mathematical Precedence . . . . .	135
3.12	Type Casting . . . . .	136
3.13	Escape Sequences . . . . .	139
3.14	The AP Java Subset . . . . .	141
3.15	Summary . . . . .	142
<b>IV Using Methods and Parameters</b>		
4.1	Introduction . . . . .	146
4.2	A Brief History of Program Design . . . . .	146
4.3	OOP, a Gentle First Exposure . . . . .	149
4.4	Using the Math Class . . . . .	152
4.5	Using Graphics Methods . . . . .	161
4.6	Summary . . . . .	180
<b>V Control Structures 1</b>		
5.1	Introduction . . . . .	182
5.2	Types of Control Structures . . . . .	183
5.3	Relational operators . . . . .	188
5.4	Keyboard Input . . . . .	190
5.5	One-Way Selection . . . . .	196
5.6	Two-Way Selection . . . . .	201
5.7	Multiple-Way Selection . . . . .	203
5.8	Fixed Repetition . . . . .	207
5.9	Conditional Repetition . . . . .	214
5.10	Control Structures and Graphics . . . . .	219
5.11	Worked-Out Exercises . . . . .	230
5.12	Summary . . . . .	242

<b>VI Using Object Methods</b>		
6.1	Introduction . . . . .	246
6.2	Classes and Objects . . . . .	247
6.3	Using Object Methods . . . . .	249
6.4	Using the Random Class . . . . .	254
6.5	Using the Math.random Method . . . . .	265
6.6	Using the DecimalFormat Class . . . . .	271
6.7	Working with Graphics Objects . . . . .	275
6.8	Combining Random and Graphics Objects . . . . .	282
6.9	Using the Scanner Class . . . . .	285
6.10	Summary . . . . .	292
<b>VII Creating Class Methods</b>		
7.1	Introduction . . . . .	296
7.2	The Math Class Revisited . . . . .	297
7.3	Modular Programming and User-Created Methods . . . . .	299
7.4	User-Declared Parameter Methods. . . . .	312
7.5	Void Methods and Return Methods. . . . .	321
7.6	Making a Utility Library Class . . . . .	326
7.7	The Payroll Case Study . . . . .	331
7.8	Program Input with GUI Windows . . . . .	349
7.9	Summary . . . . .	355
<b>VIII Creating Object Methods</b>		
8.1	Introduction . . . . .	358
8.2	Creating New Objects . . . . .	360
8.3	Constructors . . . . .	366
8.4	Using Private and Public . . . . .	371
8.5	The CardDeck Case Study. . . . .	376
8.6	The Bank Class Revisited . . . . .	388
8.7	The Cube Case Study . . . . .	391
8.8	Do You Understand Methods and Parameters? . . . . .	405
8.9	Method Summary . . . . .	420
<b>IX Introduction and Composition</b>		
9.1	Introduction . . . . .	428
9.2	Is-A and Has-A Relationships . . . . .	428
9.3	Inheritance Program Examples . . . . .	431
9.4	Composition Program Examples. . . . .	445
9.5	The JackO'lantern Case Study . . . . .	449
9.6	The Train Case Study . . . . .	455
9.7	Using Super Class Identifiers . . . . .	467
9.8	Summary . . . . .	477

<b>X Boolean Logic</b>		
10.1	Introduction . . . . .	480
10.2	What is a Boolean Statement . . . . .	481
10.3	Boolean Operators. . . . .	483
10.4	Truth Tables . . . . .	485
10.5	Laws of Boolean Algebra . . . . .	490
10.6	Venn Diagrams & Boolean Algebra. . . . .	493
10.7	Sample Boolean Problems. . . . .	498
10.8	The Boolean Data Type . . . . .	503
10.9	Boolean Logic Exercises . . . . .	508
<b>XI Control Structures 2</b>		
11.1	Introduction . . . . .	514
11.2	Brief Review of Structures . . . . .	514
11.3	Which is the Best Loop to Use? . . . . .	519
11.4	Nested Selection . . . . .	526
11.5	Nested Looping . . . . .	530
11.6	Compound Conditions . . . . .	534
11.7	Program Input Protection . . . . .	537
11.8	Short-Circuiting Compound Decisions. . . . .	546
11.9	Recursion, a Sneak Preview . . . . .	551
11.10	Worked-Out Exercises . . . . .	555
11.11	Summary . . . . .	568
<b>XII The Array Data Structure</b>		
12.1	Introduction to Data Structures. . . . .	570
12.2	One-Dimensional Array Definition . . . . .	577
12.3	Accessing Array Elements by Index . . . . .	579
12.4	Assigning Random Array Values. . . . .	585
12.5	List Class Case Study I . . . . .	588
12.6	Accessing Array Elements with for..each. . . . .	591
12.7	Array Processing with the Arrays Class . . . . .	598
12.8	Command Prompt Keyboard Input . . . . .	606
12.9	Static Imports . . . . .	611
12.10	Introduction to the ArrayList class . . . . .	615
12.11	Generics with the ArrayList Class . . . . .	623
12.12	Introduction to Two-Dimensional Arrays . . . . .	624
12.13	Summary . . . . .	631

<b>XIII Advanced Graphics</b>		
13.1	Introduction . . . . .	634
13.2	Drawing Individual Pixels . . . . .	637
13.3	Using the Font Class . . . . .	639
13.4	Mathematics and Polygons. . . . .	641
13.5	Using Mouse Routines with Graphics.. . . .	650
13.6	Understanding Graphics Displays. . . . .	672
13.7	Virtual Memory & Video Buffering . . . . .	674
13.8	Buffering Program Examples . . . . .	676
13.9	The Magic of Method update . . . . .	691
13.10	Importing Images . . . . .	695
13.11	Multi-Page Output . . . . .	701
13.12	Summary . . . . .	707
<b>XIV Serious OOP</b>		
14.1	Introduction . . . . .	720
14.2	OOP Terminology . . . . .	721
14.3	Default Constructors . . . . .	725
14.4	Accessing Attributes and Methods . . . . .	729
14.5	Constructor Overloading . . . . .	733
14.6	Accessing Multiple Files. . . . .	735
14.7	Set Methods . . . . .	737
14.8	Copy Constructors. . . . .	740
14.9	Scope of an Object . . . . .	743
14.10	Objects are References . . . . .	745
14.11	Using the "this" reference . . . . .	756
14.12	Nesting Classes with Composition . . . . .	763
14.13	Static Attributes and Methods. . . . .	766
14.14	Summary . . . . .	774
<b>XV Program Design</b>		
15.1	Introduction . . . . .	778
15.2	The Design Compromise Triangle . . . . .	783
15.3	Understand a Problem Description . . . . .	785
15.4	Class Design. . . . .	790
15.5	Method Design . . . . .	796
15.6	Class Interaction . . . . .	800
15.7	Testing and Debugging . . . . .	804
15.8	Information Hiding . . . . .	812
15.9	The Tetris Game Program Design . . . . .	815
15.10	Summary . . . . .	820

<b>XVI String Methods and Number Systems</b>		
16.1	Introduction . . . . .	822
16.2	Constructing String Objects . . . . .	824
16.3	String Concatenation . . . . .	826
16.4	Working with Substrings. . . . .	827
16.5	Changing Strings . . . . .	832
16.6	Converting Strings . . . . .	835
16.7	Comparing Strings. . . . .	837
16.8	Introduction to Number Systems. . . . .	844
16.9	Counting in Other Number Systems . . . . .	845
16.10	Counting in Base-16 . . . . .	851
16.11	Converting Any Base to Base-10. . . . .	854
16.12	Converting Base-2 to Base-10 . . . . .	860
16.13	Converting Base-10 to any Base. . . . .	865
16.14	Base-2 and Base-16 Properties . . . . .	869
16.15	Summary . . . . .	876
<b>XVII Input/Output with Sequential Files</b>		
17.1	Introduction . . . . .	880
17.2	Different Types of Files . . . . .	883
17.3	Using the File Class . . . . .	884
17.4	Files of Character Strings . . . . .	889
17.5	Files of Numbers . . . . .	899
17.6	A Note About the Scanner Class. . . . .	904
17.7	Summary . . . . .	907
<b>XVIII Algorithms I</b>		
18.1	Introduction . . . . .	912
18.2	The List Case Study . . . . .	913
18.3	Improving Input and Output . . . . .	917
18.4	The Linear Search. . . . .	921
18.5	The Bubble Sort . . . . .	929
18.6	Array Insertion and Deletion . . . . .	941
18.7	The Selection Sort. . . . .	950
18.8	The Insertion Sort . . . . .	954
18.9	The Binary Search. . . . .	958
18.10	Sorting an Array of Records . . . . .	964
18.11	The Merge Sort . . . . .	970
18.12	Testing Algorithm Efficiency with <i>TimeTest</i> . . . . .	974
18.13	Informal Algorithmic Analysis . . . . .	979
18.14	Exact Calculation of Execution Counts . . . . .	995
18.15	Summary . . . . .	1000

<b>XIX Recursion I</b>		
19.1	Introduction . . . . .	1003
19.2	Pre-Recursion Assignment . . . . .	1004
19.3	Recursion Requires an Exit . . . . .	1006
19.4	Recursion Fundamentals . . . . .	1009
19.5	Recursive Return Methods . . . . .	1018
19.6	Fibonacci, a Recursive Nono . . . . .	1025
19.7	Evaluating Recursive Methods . . . . .	1028
19.8	Manipulating Parameters of Recursive Methods . . . . .	1035
19.9	Multiple Recursive Calls and the Tower of Hanoi . . . . .	1042
19.10	Why Recursion? . . . . .	1051
19.11	Summary . . . . .	1057
<b>XX Using the ArrayList Class</b>		
20.1	Introduction . . . . .	1060
20.2	Static Array Limitations . . . . .	1060
20.3	ArrayList Methods . . . . .	1064
20.4	ArrayList and Primitive Java Types . . . . .	1080
20.5	From Static Array to ArrayList. . . . .	1083
20.6	Redefining the toString Method . . . . .	1086
20.7	Redefining the equals Method . . . . .	1098
20.8	Autoboxing. . . . .	1109
20.9	Generics . . . . .	1112
20.10	Summary . . . . .	1116
<b>XXI Interfaces, Abstract Classes and Polymorphism</b>		
21.1	Introduction . . . . .	1124
21.2	Classes and Interfaces . . . . .	1125
21.3	Implementing Interfaces. . . . .	1132
21.4	Implementing Multiple Interfaces. . . . .	1138
21.5	Using fields in an Interface. . . . .	1139
21.6	Abstract Classes . . . . .	1141
21.7	Polymorphism . . . . .	1144
21.8	The Object Class and Polymorphism . . . . .	1152
21.9	Summary . . . . .	1156

<b>XXII The AP Computer Science 'A' Examination</b>		
22.1	Introduction . . . . .	1162
22.2	The Exam Format . . . . .	1164
22.3	The AP Java Subset . . . . .	1166
22.4	Java Standard Libraries . . . . .	1169
22.5	The Case Study. . . . .	1172
22.6	Multiple Choice Sample Questions . . . . .	1173
22.7	Free Response Questions . . . . .	1177
22.8	Exam Day Important Reminders. . . . .	1181
		1188
